EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON

September 2026 – Present

TECHNICAL SKILLS

Languages: Python • TypeScript • JavaScript • Java • C++ • Go • SQL

Frameworks: Next.js • React • Django • Flask • Tailwind CSS • discord.js

Backend: RESTful APIs • MongoDB • Mongoose

Cloud: Google Cloud Platform • Amazon Web Services

Developer Tools: Git • GitHub • Jira • Docker • Figma • Vercel • npm, Yarn • L^AT_EX

PROJECTS

StarWeave | TypeScript, Tailwind CSS, RESTful API Design

May 2026 - Present

- Built a full-stack celestial object database using **Next.js, React, and TypeScript**, integrating NASA Exoplanet Archive and JPL Horizons data to aggregate 40K+ astronomical objects
- Designed a server-side data pipeline and RESTful APIs using **Next.js** to retrieve, normalize, and search heterogeneous astronomical datasets, improving query performance by 15% through **RegEx-based filtering**

EXPERIENCE

Open-Source Contributor

May 2026 – Present

DMOJ: Modern Online Judge

Remote

- Contributing to DMOJ: Online Modern Judge, an open-source competitive programming platform with **1k+** GitHub Stars used by **208K+** developers, processing **7.8M+** submissions across **5.2K+** programming problems in **75** supported languages.
- Improved frontend consistency using **Django templates and CSS** by implementing dynamic rank-based username styling and additional interface refinements
- Developing a Discord-inspired username system using **Python, Django, and SQL** by introducing **immutable user identifiers**, enabling username changes while preserving **referential integrity** through the application
- Collaborated within an open source development workflow using **pull requests, issue tracking, and real-world best coding practices** to deliver maintainable frontend improvements

Full-stack Developer

August 2025 – June 2026

JAMHacks

Remote

- Developed the Sponsors and Meet the Team sections of jamhacks.ca using Next.js and Tailwind CSS, contributing to a platform with **10K+** website impressions
- Built RESTful APIs with **Next.js API routes and Mongoose** to automate applicant acceptance, rejection, and waitlist workflows, improving processing efficiency by over 400%
- Built and deployed a Discord bot on **Google Cloud Platform** supporting 250+ hackers through automated community assistance and data collection
- Designed backend data pipelines using **Mongoose** to filter and organize applicant data, reducing manual review and supporting automated event operations
- Integrated **MongoDB and Google Vertex AI APIs** to collect, organize, and summarize participant responses for a 19-member organizing team.

Software Engineer Intern

July 2025 – August 2025

Nokia

Remote

- Developed a centralized catalogue application managing **600+ assets** for the Data Analyst team, improving documentation efficiency and accessibility by **200%**
- Automated Excel reporting and stakeholder notifications using **Power Automate workflows and API integrations**, reducing manual administrative work
- Collaborated with a 10-member Data Analysis team to identify and implement performance improvements through **Agile development practices, iterative development, and testing**
