## EDUCATION

**University of Waterloo**  
*Bachelor of Computer Science*

Waterloo, ON  
*September 2026 – Present*

## TECHNICAL SKILLS

**Languages:** Python, TypeScript & JavaScript, HTML/CSS, Java  
**Libraries/Frameworks:** React.js, Tailwind CSS, Django, Flask, discord.js  
**Developer Tools:** GitHub, Jira, Visual Studio Code, Figma, L<sup>A</sup>T<sub>E</sub>X

## EXPERIENCE

### Full-stack Developer

August 2025 – June 2026

*JAMHacks*

*Remote*

- Developed and optimized the 'Sponsors' and 'Meet the Team' sections of jamhacks.ca using Next.js and Tailwind CSS, contributing to a platform that generated **10K+** website impressions
- Engineered scalable RESTful APIs using Next.js API routes and Mongoose queries to automate applicant acceptance, rejection, and waitlist workflows, improving operational efficiency by over **400%**
- Designed backend data-filtering systems leveraging **Mongoose and efficient API querying** to streamline participant management and reduce manual review overhead
- Built and deployed Discord bot infrastructure on Google Cloud Platform Virtual Machines, supporting **250+** hackers through automated community assistance and data collection
- Implemented RESTful API integrations within the Discord bot, combining **MongoDB/Mongoose data retrieval with Google Vertex AI APIs** to aggregate and structure participant response data for a 19-member organizing team

### Software Engineer Intern

July 2025 – August 2025

*Nokia*

*Remote*

- Developed a centralized catalogue application managing **600+** assets for the Data Analyst team, improving documentation efficiency and accessibility by **200%**
- Engineered automated **Power Automate workflows and API integrations** to synchronize Excel-based reporting data and distribute stakeholder notifications, reducing manual operational overhead
- Collaborated with a 10-member Data Analysis team** to propose and implement performance improvements for the catalogue platform through iterative feedback and technical problem-solving
- Contributed to process optimization initiatives by streamlining internal data management and reporting operations within **Jira**

### Co-President

June 2024 – June 2026

*Laurel Heights Secondary School Computer Science Club*

*Waterloo, ON*

- Leading and teaching weekly lectures on computer science topics to **100+ club members**, strengthening and improving their skill sets towards real-world technology
- Boosting club attendance by **200%** by communicating with 6 other executive members to host events such as project showcases, guest speakers, and competition workshops
- Using React** to enhance club's information management system by implementing new features, including an attendance leaderboard, lesson archive, and project submission page

## PROJECTS

### DMOJ Open Source Contributor | *Django, CSS, Git*

May 2026 - Present

- Contributed to a large-scale open source project with **1K+ GitHub stars** by resolving frontend UI issues within the platform's user search functionality
- Implemented **dynamic username styling logic** to ensure user search results accurately reflected rank-based color assignments, improving visual consistency and user experience
- Collaborated within an open source development workflow using **pull requests, issue tracking, and real-world best coding practices** to deliver maintainable frontend improvements
